11. TOXICOLOGICAL INFORMATION

- Health Hazard Summary** Low toxicity – irritant. When used in small quantities, the potential for over exposure is reduced. Use safe work practices to avoid eye/skin contact and vapour generation/inhalation.
- Eye** Irritant. Exposure may result in lacrimation, irritation, pain and redness.
- Inhalation** Low to moderate irritant. Over exposure to mists or vapours (if sprayed) may result in mucous membrane irritation of the nose and throat with coughing. Low product volatility considerably reduces the potential for an inhalation hazard.
- Skin** Irritant. Prolonged contact may result in drying and de-fatting of the skin with rash and dermatitis.
- Ingestion** Low toxicity. Large dose ingestion may result in nausea, vomiting and reversible gastrointestinal irritation.
- Toxicity Data** Based on chemical profile this product is expected to have an Oral Toxicity value greater than 10 g/kg body weight. (OECD 33, paragraph 3.2) and a dermal toxicity greater than 2.0 g/kg

12. ECOLOGICAL INFORMATION

- Environment** ATMOSPHERE: Not a hazardous air pollutant. Extremely low volatility.
WATER: Should degrade relatively rapidly via biodegradation.
Hazard to Aquatic Organisms: >100mg/l (rainbow trout, 96 hrs)
SOIL: Biodegradable. Based on formula and biodegradability, potential for bioaccumulation is low.

16. OTHER INFORMATION

Additional Information

COLOUR RATING SYSTEM: Reports are assigned a colour rating of Green, Amber or Red for the purpose of providing users with a quick and easy means of determining the hazardous nature of a product. Safe handling recommendations are provided in all reports so as to clearly identify how users can control the hazards and thereby reduce the risk (or likelihood) of adverse effects. As a general guideline a Green colour rating indicates a low hazard, an Amber colour rating indicates a moderate hazard and a Red colour rating indicates a high hazard.

PERSONAL PROTECTIVE EQUIPMENT GUIDELINES: The recommendation for protective equipment contained within this report is provided as a guide only. Factors such as method of application, working environment, quantity used, product concentration and the availability of engineering controls should be considered before final selection of personal protective equipment is made.

HEALTH EFFECTS FROM EXPOSURE: It should be noted that the effects from exposure to this product will depend on several factors including frequency and duration of use, quantity used, and effectiveness of control measures, protective equipment used and method of application. Given that it is impractical to prepare a report which would encompass all possible scenarios, it is anticipated that the users will assess the risks and apply control methods where appropriate.
