11. TOXICOLOGICAL INFORMATION

Health Hazard Summary	Low toxicity – irritant. When used in small quantities, the potential for over exposure is reduced. Use safe work practices to avoid eye/skin contact and vapour generation/inhalation.		
Eye	Irritant. Mild, reversible eye irritation may occur based on relevant laboratory studies. This potential is reduced by immediate rinsing of eyes in case of eye contact.		
Inhalation	Low irritant. No special ventilation is required during use. Large-scale uses indoors should provide an increased rate of air exchange.		
Skin	Low irritant. Mild, reversible skin irritation may occur for those with dermal conditions or chemical sensitivities. A 6-hour exposure to human skin under a patch did not produce irritation. No toxic effects are associated with daily skin exposure. Skin irritation may, however, occur with repeated, prolonged exposure.		
Ingestion	Low toxicity. Large dose ingestion may result in nausea, vomiting and reversible gastrointestinal irritation.		
Toxicity Data	Based on chemical profile this product is expected to have an Oral Toxicity value greater than 5.0 g/kg and a dermal toxicity greater than 2.0 g/kg. (OECD 33, paragraph 3.2)		
Proprietary Bacteria	ORAL LD ₅₀	DERMAL LD ₅₀	INHALATION LC ₅₀
Surfactant Blend	>5,000 mg/kg (rat)	> 2,000 mg/kg	Not Available

12. ECOLOGICAL INFORMATION

Hazard to wild mammals:	Low, based on toxicology profile.
Hazard to avian species:	Low, based on toxicology profile.
Hazard to aquatic organisms:	Low, based on toxicology profile.
Chemical Fate Information:	Biodegradable based on biodegradation profiles of ingredients

Additional information can be found in Section 15: REGULATORY INFORMATION

13. DISPOSAL CONSIDERATION

Waste Disposal	For small amounts, absorb with sand, vermiculite or similar and dispose of to an approved landfill site. For larger amounts, contact the manufacturer for additional information. 16. OTHER INFORMATION

Additional Information COLOUR RATING SYSTEM: Reports are assigned a colour rating of Green, Amber or Red for the purpose of providing users with a quick and easy means of determining the hazardous nature of a product. Safe handling recommendations are provided in all reports so as to clearly identify how users can control the hazards and thereby reduce the risk (or likelihood) of adverse effects. As a general guideline a Green colour rating indicates a low hazard, an Amber colour rating indicates a moderate hazard and a Red colour rating indicates a high hazard.

PERSONAL PROTECTIVE EQUIPMENT GUIDELINES: The recommendation for protective equipment contained within this report is provided as a guide only. Factors such as method of application, working environment, quantity used, product concentration and the availability of engineering controls should be considered before final selection of personal protective equipment is made.

HEALTH EFFECTS FROM EXPOSURE: It should be noted that the effects from exposure to this product will depend on several factors including frequency and duration of use, quantity used, and effectiveness of control measures, protective equipment used and method of application. Given that it is impractical to prepare a report which would encompass all possible scenarios, it is anticipated that the users will assess the risks and apply control methods where appropriate.
