PRODUCT NAME: Simple Green Parts Washer

Health Hazard Summary	Low toxicity – irritant. When used in small quantities, the potential for over exposure is reduced. Use safe work practices to avoid eye/skin contact and vapour generation/inhalation.
Eye	Irritant. Mild, reversible eye irritation may occur based on relevant laboratory studies. This potential is reduced by immediate rinsing of eyes in case of eye contact. Reversible blurred vision may occur.
Inhalation	Low irritant. Good ventilation should be present during use. Large-scale uses indoors should provide an increased rate of air exchange.
Skin	Low irritant. Mild, reversible skin irritation may occur for those with dermal conditions or chemical sensitivities. A 6-hour exposure to human skin under a patch did not produce irritation. No toxic effects are associated with daily skin exposure. Skin irritation may, however, occur with repeated, prolonged exposure.
Ingestion	Low toxicity. With large doses ingestion may result in nausea, vomiting and reversible gastrointestinal irritation.
Toxicity Data	Oral LD 50 (rat) >5g/kg body weight Dermal LD 50 (rabbit) >2g/kg body weight Toxicity extrapolated from ingredients. Animal testing not conducted.

12. ECOLOGICAL INFORMATION

Environment	ATMOSPHERE: No hazardous ingredients. <80 g/L VOCs WATER: Product will degrade readily via biodegradation. Considered practically non-toxic per EPA's aquatic toxicity scale. SOIL: If released to soil, ready biodegradation of product will occur.

adverse effects. As a general guideline a Green colour rating indicates a low hazard, an Amber colour rating indicates a moderate hazard and a Red colour rating indicates a high hazard.

PERSONAL PROTECTIVE EQUIPMENT GUIDELINES: The recommendation for protective equipment contained within this report is provided as a guide only. Factors such as method of application, working environment, quantity used, product concentration and the availability of engineering controls should be considered before final selection of personal protective equipment is made.

HEALTH EFFECTS FROM EXPOSURE: It should be noted that the effects from exposure to this product will depend on several factors including frequency and duration of use, quantity used, and effectiveness of control measures, protective equipment used and method of application. Given that it is impractical to prepare a report which would encompass all possible scenarios, it is anticipated that the users will assess the risks and apply control methods where appropriate.
