### 11. TOXICOLOGICAL INFORMATION

<b>Health Hazard Summary</b>	Low toxicity – irritant. When used in small quantities, the potential for over exposure is reduced. Use safe work practices to avoid eye/skin contact and vapour generation/inhalation.
<b>Eye</b>	Irritant. Mild, reversible eye irritation may occur based on relevant laboratory studies. This potential is reduced by immediate rinsing of eyes in case of eye contact. Reversible blurred vision may occur.
<b>Inhalation</b>	Low irritant. Good ventilation should be present during use. Large-scale uses indoors should provide an increased rate of air exchange.
<b>Skin</b>	Low irritant. Mild, reversible skin irritation may occur for those with dermal conditions or chemical sensitivities. A 6-hour exposure to human skin under a patch did not produce irritation. No toxic effects are associated with daily skin exposure. Skin irritation may, however, occur with repeated, prolonged exposure.
<b>Ingestion</b>	Low toxicity. With large doses ingestion may result in nausea, vomiting and reversible gastrointestinal irritation.
<b>Toxicity Data</b>	Oral LD 50 (rat) >5g/kg body weight Dermal LD 50 (rabbit) >2g/kg body weight Toxicity extrapolated from ingredients. Animal testing not conducted.

### 12. ECOLOGICAL INFORMATION

<b>Environment</b>	ATMOSPHERE: No hazardous ingredients. <80 g/L VOCs WATER: Product will degrade readily via biodegradation. Considered practically non-toxic per EPA's aquatic toxicity scale. SOIL: If released to soil, ready biodegradation of product will occur.

### 15. REGULATION INFORMATION

<b>AICS</b>	All chemicals listed on the Australian Inventory of Chemical Substances (AICS)
<b>Poison Schedule</b>	A poison schedule number has not been allocated to this product using the criteria in the standard for the Uniform Scheduling of Drugs and Poisons (SUSDP)

### 16. OTHER INFORMATION

<b>Additional Information</b>	COLOUR RATING SYSTEM: Reports are assigned a colour rating of Green, Amber or Red for the purpose of providing users with a quick and easy means of determining the hazardous nature of a product. Safe handling recommendations are provided in all reports so as to clearly identify how users can control the hazards and thereby reduce the risk (or likelihood) of adverse effects. As a general guideline a Green colour rating indicates a low hazard, an Amber colour rating indicates a moderate hazard and a Red colour rating indicates a high hazard.
